Re: 2007 ACTRA strike

On behalf of the membership of Danish Actors' Association, I wish to express our strongest support and solidarity to the membership of ACTRA in strike against the film and television producers' associations in Canada.

The struggle to achieve fair agreements on the payment for use of film and television productions on the Internet is extremely important, for Canadian actors and for actors all over the world.

Revenue from new business models on the Internet and other new platforms are rapidly growing and will over time replace or reduce traditional sources of income. The thought that producers should obtain rights of utilization on the new platforms for a flat fee is very scarring, and such a regime would be devastating to the livelihood of actors in film and television.

We wish to convey our best wishes for a successful strike and we will instruct our membership to be aware of possible Canadian productions made in our country. They will not be working in such productions and we will keep in touch with ACTRA in case we receive any information about Canadian productions in Denmark.

Very Best Wishes

Henrik Petersen
President
